Claims

[c1]	1.A computer system comprising:
	a chassis, having a plurality of slots thereon each configured for receiving
	one of a plurality of planar shaped circuit cards therein;
	a shroud coupled to said chassis to form an enclosure about said plurality of
	planar shaped circuit cards;
	said plurality of planar shaped circuit cards each configured for providing an
	independent dedicated server function; and,
	each of said plurality of planar shaped circuit cards being configured so as to
	be free from any direct communication connection with any inter-card
	system bus inside said enclosure.
[c2]	2.A system of claim 1 wherein said plurality of planar shaped circuit cards
	comprises a first card providing an email server function; a second card
	providing a web server function; and a third card providing a file storage
	function.
[c3]	3.A system of claim 1 wherein power is provided to said plurality of planar
	shaped circuit cards by a sole power supply.
[c4]	4.A system of claim 1 wherein said plurality of slots comprises a plurality of
	industry standard slots, each of which is configured for mechanical and
	electrical cooperation with one of said plurality of planar shaped circuit cards
	via an industry standard expansion slot.
[c5]	5.A system of claim 4 wherein said plurality of industry standard slots are
